**NOTED WOMAN WILL AID MRS. LOCKWOOD**

Plans to Interest Business Men in Putting Loan on Property.

Efforts are being made on behalf of Mrs. Belva A. Lockwood, to co-ordinate the work of the various individuals and organizations who are endeavoring to raise the necessary loan of \$10,000 to save the property of the venerable woman.

A very prominent woman, who prefers that her name be not used at present, has taken hold of the matter, and on a purely business basis, will carry several propositions to business men of the city to handle the property.

Mrs. Lockwood was greatly cheered when a bunch of violets was brought to her. She said, "I was just thinking this morning that it would be the first time in years I had been unable to get out on this particular day and try to find a violet. It is a coincidence and I take it as a good omen."

**Trade Body Will Urge Sixteen New Buildings**

Street High School.

The charities and corrections committee favors the location of the leprosy hospital at a point in the country. Improvements to the Anacostia section, with a canal connecting the Eastern branch with Chesapeake bay will be recommended.

## Tolerance of the Fly Is Criminal in Spirit

Criminal neglect will be charged against Washington if the intolerable nuisance and disease-carrying typhoid fly is allowed to roam free and undisturbed this summer.

During the fly season, greater attention should be paid to screening of rooms.

During the fly season, cleanliness should be the watchword of every home.

During the fly season, every man, woman and child should count it a privilege to kill at least 100 flies. The time to kill the fly is NOW. Exterminate the larvae, murder the female insect KILL THE FLY.

"Even if the typhoid or house fly were a creature difficult to destroy," says Dr. L. O. Howard, chief of the Bureau of Entomology, who knows the deadliness of the pest, "the general failure on the part of communities to make any efforts

to reduce its numbers could properly be termed CRIMINAL NEGLIGENCE. Since it is comparatively an easy matter to do away with the plague of flies, this neglect becomes an evidence of tolerance or of a carelessness in regard to disease-producing filth which to the informed mind constitutes a serious blot on the hand of civilization.

That the expression of Dr. Howard is not exaggerated is borne out by other scientists who have studied the deadly proclivities of the fly. "The domestic fly," writes one of these entomologists, "is passing from a disgusting nuisance and troublesome pest to a reputation of being a dangerous enemy to human health. The millions of bacteria on a single fly may run all the way from 50 to 500,000. Early in the fly season the number of bacteria on flies are comparatively small, while later the numbers are comparatively large."

This is early in the fly season. Kill the pests now.

## Alexandria County Wants More Cars and Schools

Citizens of Alexandria county will meet at Union Church, at Park Lane, Va., tonight, to open a campaign for better car service between Park Lane and Washington, and to plan for better school facilities and civic improvements. They say an hourly service on the Washington and Old Dominion railway works a hardship on the people of the section and retards the growth of the community.

An effort will be made tonight to make permanent a temporary organization formed at a recent meeting, at which the following officers were named: Thomas C. Malone, chairman; E. Mayne, vice chairman; A. A. Reed, secretary.

William W. Malone, of the Alexandria County Service Association, will explain the bond issue for improvements now before the county, and W. T. Hodges, superintendent of schools, will talk on the necessity for a school at Park Lane.

**Tells of Finding Scott's Body in Antarctic Ice**

Commander E. R. G. Evans, of the British navy, at the Belasco Theater last night told the story of the English antarctic expedition of 1910-11, and the death of Captain Scott and his men, who died trying to get back to their base of supplies after reaching the pole and finding Amundsen's flag there ahead of them.

"This is Scott's story," said Commander Evans. "He is the hero. I am only the teller of the tale."

The daily life of the explorers as they pursued south was told graphically. The lecturer's description of the hardships, the lack of food, the heroes, huddled together on the ice was dramatic.

The lecturer was illustrated with photographs.

**"CASCARETS" ALWAYS STRAIGHTEN YOU UP**

When constipated; headachy, bilious, stomach sour, breath bad.

Get a 10-cent box now. You men and women who can't get feeling right—who have headache, coated tongue, foul taste, and foul breath, dizziness, can't sleep, are bilious, nervous and upset, bothered with a sick, gassy, disordered stomach, or have backache and feel worn out. Are you keeping your bowels clean with Cascarets, or merely forcing a passage every few days with salts, cathartic pills or castor oil?

Cascarets work. Cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and poison in the bowels.

A Cascaret tonight will straighten you out by morning—a 10-cent box from any drug store will keep your stomach sweet, liver and bowels regular, and clear for months. Don't forget the children. They love Cascarets because they taste good—never gripe or sicken.—Adv.
